

NEW JERSEY NATURAL GAS COMPANY
METER EXCHANGE PROGRAM

New Jersey Natural Gas Company has contracted with Precision Pipeline Solutions (PPS) to conduct a gas meter exchange program. The program is currently in effect, and will run through next Spring.

Not all gas meters are being exchanged; only specific individually identified meters will be involved. Precision Pipeline Solutions will telephone the customers who are involved in the exchange, and letters will be sent to them starting in mid-September.

At the time of the exchange, gas service to the property will be turned off. Upon completion of the exchange, it will be necessary for a representative from PPS to enter the home in order to relight the appliances. Be sure to ask to see their NJNG identification before permitting anyone to enter your home. There is no charge to the customer for this service.

For more information, please contact NJNG at 732 938-1280.
